

Power, Partnership, Performance: a celebration of people

On January 23, 2004, SHARCNET will celebrate its success at *Power, Partnership, Performance: a celebration of Canadian research excellence and the people who make it possible.*

This event will bring together people and organizations from across the SHARCNET community to celebrate the success of the SHARCNET Chairs and Fellowships programs.

Since 2001, SHARCNET has awarded more than \$2.6M in Fellowships to over 120 outstanding Canadian researchers, and has installed 12 new Chairs at its partner institutions across South Central Ontario. Of these individuals, 6 were recruited from outside of Canada, 1 from outside of Ontario and 1 from Ontario industry. Both programs are representative of the resounding success that SHARCNET has experienced in just over 2 years of operation.

In addition to a comprehensive research poster session and reception, the event will feature a keynote address by Paul Tsaparis, President of Hewlett Packard Canada.

On January 23, please join the SHARCNET community to celebrate Canadian research excellence and the people, institutions, organizations and agencies that make it possible.
